

Osanidde village

Praise report

SEPTEMBER 2016

The Homes

New additions

Its all joy for little Phiona (6) sister to Allen and miracle, Jesus has turned all her mourning into joy. She was left to stay at her sengs place who letter after she divorced with her husband abandoned Phiona, although she was born HIV positive, she couldn't access ARVs drugs, we came to know her through her Senga(Antie) who brought her and asked osanidde to take her up seeing she was no longer able to support little Phiona, this girl can now access free ARVs from Rapha on a daily basis, with love and care from the true FATHER and father of the fatherless.

Allen 8, Phiona's big sister.

Gladys & some girls completing this year

Vocation Update

The journey of faith that begun ten years ago for these teenagers has truly been a rewarding one. We say Ebenezer to our wonderful Lord Jesus.. Four of our girls, Sylvia, Sylvia, Gladys will be completing their vocational school training this year, while Justine will also complete her teachers training course, this means they will be ready to be released from Osanidde. Enoch will also be the second among the boys to complete his course this year he will be joining Derrick who completed his teachers training last year, three of those who finished last year have been released and are now fully qualified teachers teaching in osanidde's primary school we are grateful to the Lord for them. With focus, passion, commitment and faith in the Lord has brought their hard work to fruition. We are praying and believing for God's provision for tuition for others who are still continuing in vocational training, we pray also for vision and sustained focus in oder to reap the fruits of their hard work.

Teacher Aisha and Teacher Justine

High school Competitions

House competitions for high school

House competitions were most competitive than ever, students deployed an extra ordinary display of gifts and talents. Activities included soccer, Tag of war, music and dance., overall winner being Jerusalem House and Bethel second in place. These competitions have helped refine, Improve and develop talents at the school campus. Over 100 people from around the community attended the competitions.. Lydia from Jerusalem house in the picture is dancing Buganda traditional dance.

Surgical Team

We were honored in the last quarter to host a team of surgeons from Pacific north west surgical team. They did a tremendous job on operating tumors, hernias and other complications. Over 36 people were treated and have successfully recovered well. We are so thankful for our family at West Valley Church for releasing and trusting us with this great team, we opened wide the doors of Rapha so that the healing hand of the Lord could minister healing and love to any one that came regardless of their religious affiliations. Thank you for releasing Mumbejja Stormiye who led and coordinated the team of doctors. Here below We have a life testimony of our very own Brian,

Brian Success Story

Shalom, my name is Brian, I want to thank the doctors for their treatment on my life. I was affected with hernia in the lower abdomen I could not carry heavy things, and it also affected me in class, because my stomach would bulge and I could feel a lot of pain so strong I couldn't even sit in class. I was always tired and weak, some times my fellow friends felt I was a burden to them as in Africa, boys are supposed to be strong not tire d and weak, it affected my self esteem. When I heard the doctors are coming I was happy but also became scared as I feared a theater thinking cutting me with knives meant dyeing. But after seeing other people coming out well I took courage and got operated. I thank God am well now, my life feels much better and am able to work well without any pain!!

Team of surgions in an operation room during the outreach.

Testimonies:

The high school well has resulted into better yields for the animals and birds at the farm, as water is pumped into the central tank which in return supplies to other centers. This has helped to improve on milk yields from cows. Our cows used to produce between 7 and 9 liters, but now we are able to harvest about 22 liters a day.

Availability of clean abundant water has also helped to improve on animal health and made animals build more immunity to water related diseases which has curbed on the would be expenditure spent on medical services and loss of animal life.

Moses and Asaph treating goats

Challenges and Prayer needs.

- High school laboratory equipment Pendulums, Retort stands, glass prisms and science text books.
